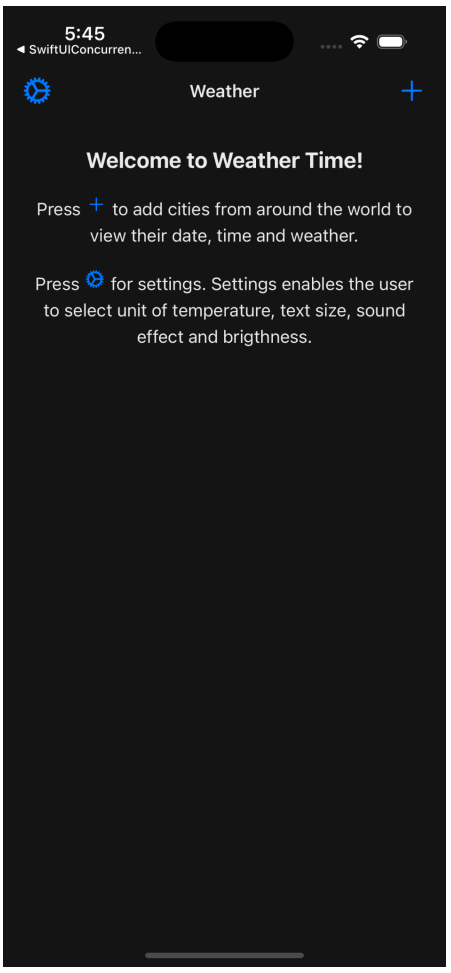
Weather Time manual

Features

Launch the "Weather Time" application from your phone's home screen.

Open the settings page from this ⚙ button in the upper left corner

Tap the ➕ in the upper right corner to open the city search page.



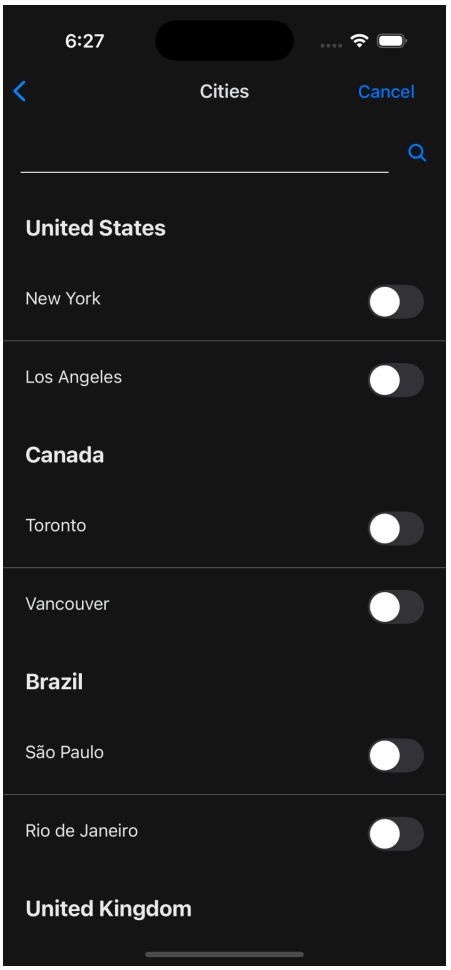
In the landscape **Tap the “Add City” button to open the city search page.** **Tap the “Settings” button to open the settings page.**	Landscape 
Adding a city

On this page, you can select any city in the world by tapping on it

In the search area at the top, you can enter keywords to narrow down the cities.

Click on the "Cancel" button to return to the main page.

When a user taps on a city, the city will be added to the main page.



Changing the settings

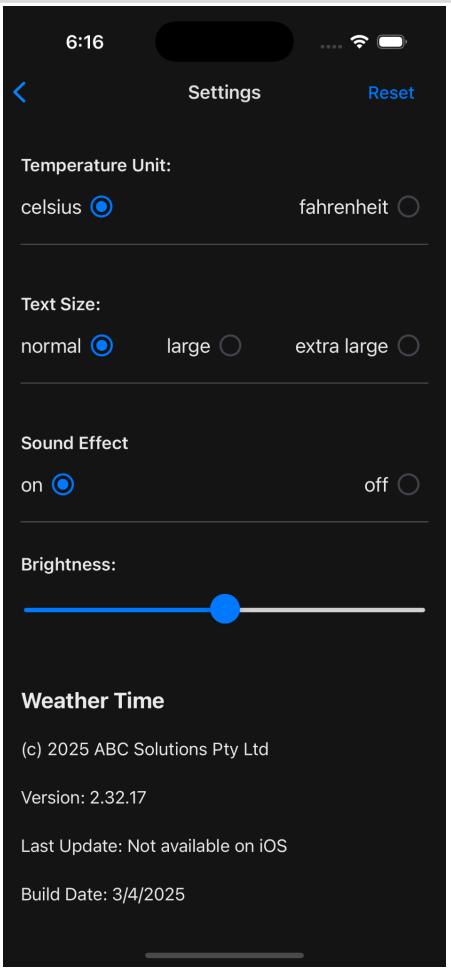
As shown in the screenshot, the settings screen consists of the following items

Temperature unit can be selected between Celsius and Fahrenheit.

Text size can be selected from Normal, Large, and Extra Large.

Sound effects can be turned on or off from Sound Effects.

Brightness can be adjusted from Screen brightness.

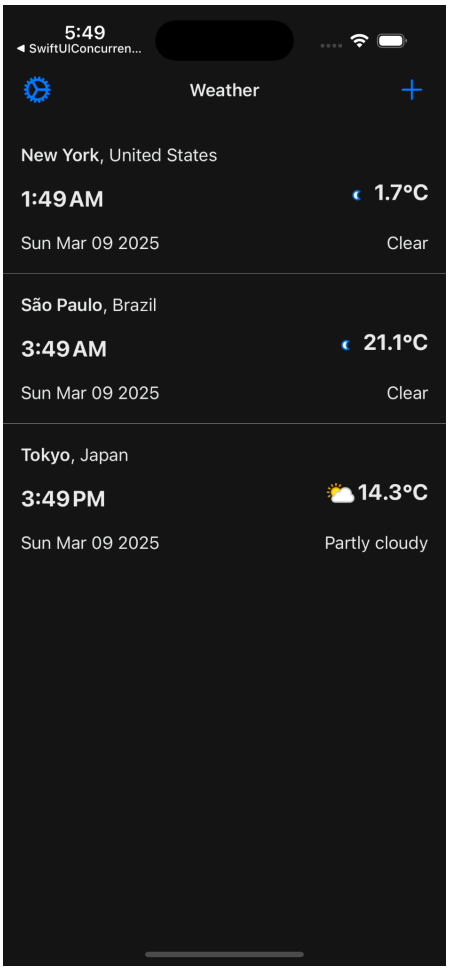


View Weather

The city you added on the Add City page.

- **City and country names. For example, Sydney, Australia.**
- **Date in weekday, month, day, year format. For example, Mon Feb 13 2025.**
- **Time in 12-hour format. For example, 10:17 AM, 1:28 PM.**
- **Temperature displayed in Celsius or Fahrenheit, depending on the setting. For example, 20 degrees Celsius.**
- **Weather icon.**
- **A description of the weather.**

To delete a city
Swipe from right to left on top of the location you want to remove to reveal the Delete button
Tap the Delete button



This page is available both in portrait and landscape mode.
